### Quick Facts

ABUNDANT has been thoroughly tested for over 10 years at trial sites throughout the South. Every year Abundant is at the top for dry matter yield. Abundant produces both high dry matter yields and high feed values, delivering higher weight gains to the animal. It has continued to demonstrate a higher resistance to rust and diseases than other varieties. Abundant combines early establishment, longer growing seasons, disease resistance, palatability, feed value, and dry matter yield into one variety.
