

# TETRALITE II

## Lolium boucheanum

## Hybrid ryegrass 4N intermediate

Excellent yields

### Rating

Hybrid ryegrass can be divided into 3 types:

Italian types, intermediate types, and Perennial types.

TETRELITE II combines the early and strong spring growth of Italian types with a very good ground cover comparable to the Perennial types. This makes TETRELITE II an outstanding variety compared to other intermediate types. The growing height of TETRELITE II is relatively high, but with good lodging resistance.

TETRELITE II is rust and disease resistant.

- Early and strong spring growth
- Ground cover like perennial types
- Remarkably high yields
- Good resistance
