## Italian ryegrass 4n

A true "Italian" with excellent resistance to rust and Drechslera leafspot.

- JEANNE develops very few stems.
- Good resistance to lodging.
- Very best rust resistance.
- Top yield

### Rating

### Characteristics

JEANNE develops very few stems in the year of sowing, which makes it differ significantly from Westerwoldicums. Nevertheless, JEANNE has a very good resistance to lodging.

### Resistance to diseases

With the character 2.5 in the official trials in France for rust, JEANNE is the very top variety within this category.

### Fantastic yield as intercropping

Jeanne was tested in Italy with high marks in rel. 114 in drymatter compared to all listed varieties.
