

GONDOLIN

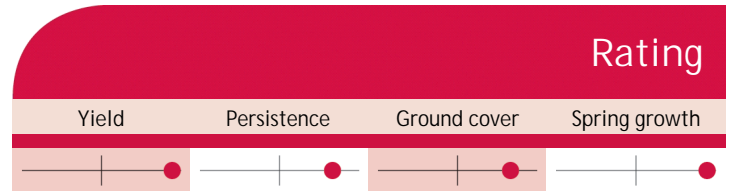

Festuca rubra rubra

Strong creeping red fescue

High yield and exceptional persistence

- Very high yields
- High flexibility
- Fast spring growth
- Very winterhardy

High flexibility

GONDOLIN offers high flexibility for forage use due to its adaptability to various climates in areas such as Denmark, Germany, Sweden, Switzerland and Austria.

Fast spring growth

GONDOLIN grows very fast in spring which makes it highly competitive with other early spring grasses.

Winter-hardiness

GONDOLIN has proven to be very winterhardy under extreme climatic conditions in both Germany and Austria.

Tough competitor to weeds

GONDOLIN is good at developing runners which results in a dense and weed-free cultivar.

Disease resistance

GONDOLIN has excellent resistance to Crown Rust and a good resistance to other common diseases in grasses.
