

## Brachiara

- Very vigorous
- High yields
- Excellent palatability
- High quality

### Rating

### Quick Facts

MULATO grass is the first commercially available Brachiaria hybrid. Superior in quality and productivity, no other tropical grass offers livestock producers more benefits in terms of milk and beef yields. This vigorous, tillering forage grass, with stoloniferous growth, has excellent forage production, abundant foliage, vigorous regrowth, whether cut or grazed, and excellent palatability.
