

## TECH SHEET

\*Indicates plots planted with Microclover

### QUICK FACTS

**MICROCLOVER-** Many years of natural selection have resulted in revolutionary microclovers with all the benefits of traditional clover packed into very tiny leaves.

**Healthy & Lush-** Microclover "spoon feeds" nitrogen to the grass, producing a healthy, dense and naturally green lawn that is easy to maintain.

**Weed Free Turf-** The vigorous and dense growth of clover and grass together crowds out existing weeds and prevents new weeds from establishing. The unique dense stolon structure allows microclover to tolerate exceptionally low mowing heights.

**Green Lawn all year long-** Microclover has been bred to stay green from spring to winter. The healthy growth of the accompanying grasses contributes to the overall attractive green color which remains throughout the year.

**Environmentally friendly-** Very little fertilizer, fungicides and water are required for microclover. It would be difficult to find a more environmentally friendly, cost effective, and low maintenance turf solution.

### Notable Features

-  NATURALLY GREEN
-  TOLERATES CLOSE MOWING
-  CROWDS OUT WEEDS
-  LOW MAINTENANCE
-  NITROGEN ENHANCEMENT

### PHOTO EXAMPLE

### SEEDING RATES

2-4 lbs / 1000 sq ft

Growth Habit	Estab. Rate Days	LHC Tol. to 1/2"	Mowing Frequency	Traffic Tol. (Brinkman)	Thatch Production	Comp. Mix	Nitrogen Required	Shade Tolerance	Cold Tolerance	Drought Tolerance	ET Rate mm/day	Endophyte	Salinity Tol. mmhos
Stolons	Fair	Excellent	1x month	Excellent	Low	Good	None	Very Good	Excellent	Excellent	Medium 7-8	No	<3 Poor
